

Seminar Report on
“Cyber Security Roadmap: From Student to Professional”

Date: 01/04/2026

A Seminar on “Cyber Security Roadmap: from student to professional” was conducted for B.com and B.sc Students on our campus. The session was delivered by Mr. Shiva Kumar M.V., Senior Security Engineer, who shared valuable insights into the growing field of cyber security and career oppournities available for students.

The seminar lasted for one and a half hours and was highly informative and engaging. Mr. Shiva kumar, explained the importance of cyber security in today’s digital world and discussed the increasing demand for skilled professionals in the industry.

During the session, he provided a clear road map for students who wish to build a career in cyber security. He explained the essential technical and professional skills required, various certification options, and the different career paths available in the field. He also highlighted the importance of continuous learning, practical experience, and staying updated with the latest security trends.

The speaker shred real world examples of cyber threats and demonstrated how organizations protect their systems and data from cyber-attacks. Students gained a better understanding of network security, digital safety and security bets practices.

An interactive question – and – answer session was held at the end, where students clarified their doubts regarding career opportunities, certifications, internships and industry expectations.

The seminar was very beneficial for the participants and inspired many students to explore opportunities in cyber security. The session concluded with a vote of thanks to Mr. Shiva Kumar. For sharing his knowledge and expertise with the students.
